INVITATION

We would like to invite you to the jubilee 25th International scientific ENVIRO 2021 conference entitled **"Reducing the risk of negative climate change impacts in the landscape"**. The conference is organized by the Faculty of Horticulture and Landscape Engineering, Slovak University of Agriculture in Nitra, Slovakia and Faculty of Environmental Engineering and Land Surveying, University of Agriculture in Krakow, Poland. The event will take place in ..., Slovakia (exact location will be provided soon) on **2. – 4. June, 2021**.

ENVIRO conference will provide the space to a number of fields of science, research, applications, trends and guidelines for the active support of reducing the risk of negative climate change impacts in the landscape.

The conference will focus on the issues of climate change (impacts, adaptation, mitigation) in the landscape such as floods, droughts, water and soil management, land consolidation, landscape conservation, landscape architecture, green infrastructure, urban space, waste management, and supporting tools modeling various risk natural phenomena and anthropogenic impacts by Geo-information technologies, and on environmental interdependence of agricultural land use.

Due to situation related to CORONAVIRUS (COVID-19) crisis, the 25th International Conference ENVIRO 2020 that was scheduled to take place in Nitra (16. – 18. September, 2020) has been postponed to 2. – 4. June, 2021 as a result of the COVID-19 emergency.
